

AZOS[®]

Red Liquid

FOR AGRICULTURAL AND
HORTICULTURAL APPLICATIONS

Nitrogen Fixing Bacteria

CONTAINS NON-PLANT FOOD INGREDIENT(S):

Contains the following species of Azotrophic Bacteria

Azospirillum brasilense 1X10⁸ CFU/ml*
Inert Carrier 99%

*(Colony Forming Units)

Application Rates:

Seed Coating: Apply at 0.5% by weight to surface of the seed. Do not expose inoculum to temperatures above 100° F.

Spray Application: Apply at a rate of 16 ounces per acre (0.80kg per ha) or 1 ounce per 3,630 sq. ft. May be mixed with other organic fertilizers or plant biostimulants. Not recommended for tank mixes combining fungicides, insecticides or soluble fertilizers with a high salt index. Mix contents of the package into 15 to 50 gallons of water and apply evenly to a one acre area.

Irrigation: May be applied by overhead or drip irrigation at the recommended rate of 16 ounces per acre.

Caution: Do not expose to temperatures above 100°F (38°C). Do not allow inoculant to freeze.

Statement of Claims: RTI certifies that this product contains the micro-organism identified on the label at the cfu (colony forming units) levels stated. The organism(s) are sensitive to environmental conditions and RTI is unable to make any guarantees beyond the above statement.
