

MYKOS[®] GOLD WP

**FOR AGRICULTURAL AND
HORTICULTURAL APPLICATIONS
ADDS BENEFICIAL MICROBES
TO THE SOIL ENVIRONMENT**

Mycorrhizal Inoculant Wettable Powder

CONTAINS NON-PLANT INGREDIENT

Contains the following species of vesicular-arbuscular mycorrhizal fungi

Rhizoglyphus intraradices 250 propagules / g

Directions for Use:

Mycorrhizal inoculants must be applied on or near newly developing roots. The use of chemical based fungicides in combination with this product is not recommended. Mykos Gold WP applied at higher rates may speed-up colonizations of crops.

Vegetable Transplants & Direct Seeding:

Mix 5-7 lbs of Mykos Gold WP into 50 to 500 gallons of water to use per acre. Continue to stir vigorously to completely distribute the product. Do not combine with fungicide treatments.

Drip Systems:

Mix 5-7 lbs of Mykos Gold WP into 50 to 500 gallons of water to use per acre. Continue to stir vigorously to completely distribute the product.

Root Drench:

Mix 10 lbs of Mykos Gold WP in 25 cups (6 liters) of water. Continue to stir vigorously and drench root ball while the product is still in suspension. Discard unused product after it has been mixed.

Caution:

Store under cool and dry conditions. Do not expose inoculants to direct sunlight for extended periods of time. Always wear a dust mask when handling.

Statement of Claims:

RTI certifies that the product contains the microorganism(s) identified on the label and the spore or propagule count as stated. The organism(s) are sensitive to environmental conditions and RTI is unable to make any guarantees beyond the above statement.
